

The length of slate hooks required:

Equals the head lap + 2-3 mm.

Having determined the exposure level to prevailing weather conditions and taking into account adverse local effects, use the table to establish the head lap:

EXPOSURE

Pitch of roof	Sheltered	Moderate	Severe
14	150		
20	120	140	150
25	110	120	130
30	100	110	120
35	90	100	110
40	80	90	100
45	70	80	90
75	60	70	70
